DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 12/16/2010 has been entered.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The Examiner updated the search and reviewed references and the IDS submitted 12/16/2010 by the Applicant. The search did not bring up any new pertinent art that is not already of record. In the submitted references, JP2002531978 (JP-T 2002-531978 as referred to as within Japanese Office Action dated July 20, 2010) is the Japanese national stage application of PCT/FR99/02912. Further US Patent No. 6,424,597 is the US national stage application of the same PCT/FR99/02912. US Patent No. 6,424,597 was the reference for the basis of a 35 U.S.C. § 102 rejection of the Applicant's claims in prior Office Action mailed 07/09/2010. The 35 U.S.C. § 102 rejection of the Applicant's claims was overcome by the Applicant's amendments filed 09/08/2010 and the Examiner's Amendment filed 09/16/2010 which clearly and properly invoked 112th,

sixth paragraph. The clear and proper invoking of 112th, sixth paragraph results in the Applicant's claims being interpreted within a means-plus-function format and proper reading of the corresponding structure in the specification must be taken into account. Since US Patent No. 6,424,597 and JP2002531978 share priority with PCT/FR99/02912, the Examiner concludes that Applicant's amendments filed 09/08/2010 and the Examiner's Amendment filed 09/16/2010, which were deemed sufficient to overcome the US Patent No. 6,424,597, are also sufficient to overcome the JP2002531978 publication as well.

The Examiner carefully reviewed the Japanese Office Action dated July 20, 2010 with the corresponding Citations 3 and 4 of the listed references: JP57-075640 (JP-A S57-075640) and JP59-174151 (JP-A S59-174151). The Applicant invoked 112th, sixth paragraph thus the Applicant's claims must be interpreted within a means-plus-function format and proper reading of the corresponding structure in the specification must be taken into account. The Examiner upon review of Citations 3 and 4 did not find the references to disclose similar corresponding structure as described with the Applicant's Specification page 9 which discloses the "means for bringing into contact" consisting of spring pistons fitted on the transducer. The Examiner did not find the corresponding structure of the spring pistons fitted on the transducer or various other structures as described in the Applicant's specification within the Citations 3 and 4. As such, the claims remain allowable for the reasons of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
